

COMPANY PROFILE

GOSHU KOHSAN (VIETNAM) CO., LTD.

LEADING COMPANY IN WATER ENVIRONMENT IN VIETNAM

GOSHU KOHSAN (VIETNAM) CO., LTD.

Leading Company in Water Environment in Vietnam

About us

Goshu Kohsan (Vietnam) Co., Ltd. (GKV) is an EPC (*) Company specialized in all aspects of Water Treatment, Effluent Treatment, Sewage Treatment, Water and Wastewater Recycling.

Through our professional activities, GKV has obtained the expertise in state - of - art technology in these fields.

Since our first launch in the Vietnam market in 1995, GKV has achieved a track record of securing over 600 plant projects nationwide and provides all necessary services to satisfy the client's demands regardless industries.

Company Information

Company Name	Goshu Kohsan (Vietnam) Co., Ltd. (GKV)
Established	December 16, 2004
Investment Capital	USD 3,163,000 (As 2023)
Bases	Head Office: Hanoi Branch : Ho Chi Minh (Binh Duong) and Da Nang
Founder	Mr. Ariruth Isariyakunakorn (Akio Nakamoto)
General Director	Mr. Nguyen Van Huy
No of Employees	161 (As of March, 2026)
Subsidiary	Goshu Kohsan (Bangladesh) Co., Ltd.

Business Domains of GKV

GKV has 2 business domains, namely, EPC and Solution. GKV performs for not only new plant construction, but also modification, renovation and upgrading of existing facilities. GKV provides all necessary services such as survey, consulting, supporting for EIA procedure, treatment test using bench scale / pilot scale plants, basic design and detail design. GKV as a real EPC company, can also perform all kind of work as Full-Turn-Key projects from engineering, procurement, civil construction, mechanical and electrical erection and installation, commissioning, performance test, and operation training.

GKV's Solution business consists of 3 business: Operation & Maintenance, Chemical Supply and Water/Wastewater Analysis. All necessary services for plant operation are provided by GKV as one package in response to the customer's demand.

EPC Work (Plant Construction)

- Water Treatment: portable water treatment, pure water treatment and ultra-pure water treatment
- Wastewater Treatment: industrial effluent treatment, sewage treatment,
- Decentralized sewage treatment
- Sludge Treatment
- Gas & Odor Treatment

Chemical Supply

- Commodity chemicals for WT, WWT...
- Specialty chemicals for R.O, WWT, Cooling, Boiler...
- Polymer for Coagulation & Dewatering
- Fine chemicals
- Industrial chemicals for production and process
- Ion Exchange Resin
- Laboratory Reagent
- Chemical feeding and metering equipment

Maintenance and Operation Work

- Integrated Comprehensive Long-Term O&M
- Plant operation and management
- Periodical general inspection
- Cleaning for membranes, Filtering media, etc.
- Regeneration of ion exchange resin, etc.
- Spare Parts supply, consumable parts replacement
- Provision of periodical maintenance report
- Consultancy services for operation, etc.

Water/Wastewater Analysis Work

- General analysis and measurement
- Substance analysis
- Test and inspection
- Determine & evaluate parameters in water, wastewater following National Technical Regulations

GOSHU KOHSAN (VIETNAM) CO., LTD.

Leading Company in Water Environment in Vietnam

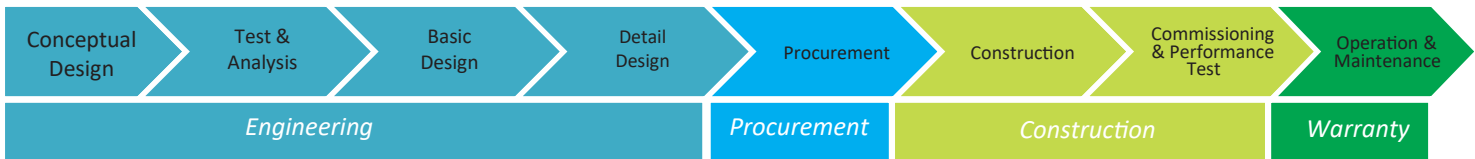

EPC Work

GKV performs as an EPC company following works;

- ✓ Site survey
- ✓ Conceptual design
- ✓ Treatment test and analysis using actual/synthetic water/wastewater
- ✓ Basic Design and drawings such as flowsheet diagram, hydraulic profile, layout etc.
- ✓ CAPEX and OPEX Estimate
- ✓ Implementation of projects after contract award, including:
 - Detail design and drawings of civil, mechanical, and electrical
 - Equipment selection, vendor selection and purchasing
 - Fabrication work at a factory
 - Implement construction work at site
 - Commissioning for installed system
 - Performance Test
 - Training for operators/handing over project to customer

O&M Work

In accordance with customer's demand, GKV performs;

- ✓ Daily updating system operation status and transferring work to operators.
- ✓ Daily checking & Inspection water quality to meet regulation standards.
- ✓ Record operation data & clarify all maintenance works of each day.
- ✓ Trouble shooting: investigate to find out the root cause of all troubles and decide corrective actions without any effect on customers' production line.
- ✓ Consulting: give advice, consult customers on selecting suitable solution in operation of their treatment system.

Equipment Replacement

Integrated Comprehensive Long-Term Contract for Operation and Maintenance

- ✓ Performance Guaranteed One Stop Service based on experiences, know-how and ingenuity of the Contractor
- ✓ Stable operation with lower chemical and energy consumption by experienced engineers
- ✓ Appropriate analysis frequency in each parameter, and monitoring to satisfy with treated water/wastewater quality
- ✓ Consultation with the Customer and support in negotiation between the Customer and Authority
- ✓ Emergency Correspondence against trouble by stock of major spare parts in the Contractor's warehouse
- ✓ Preventive maintenance in order to minimize trouble
- ✓ Reducing Contract procedures in order to the Customer's staffs concentrate on other works
- ✓ Free from unexpected expenses due to increase in chemical consumption caused by deterioration of water quality, or due to sudden breakdown of equipment.

Chemical Supply Work

Since GKV is an EPC contractor having very capable laboratory for water & wastewater analysis, our chemical supply services is not just supplying chemicals

Cooperating with other departments, GKV sincerely consults, provides necessary technical information and reports on feasibility study for customer's best solution. After using chemical, GKV also checks and monitors its performance and reports to the customer for confirmation of effectiveness.

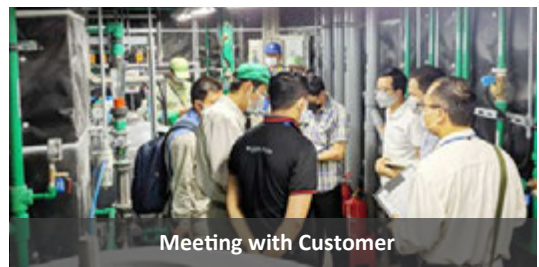

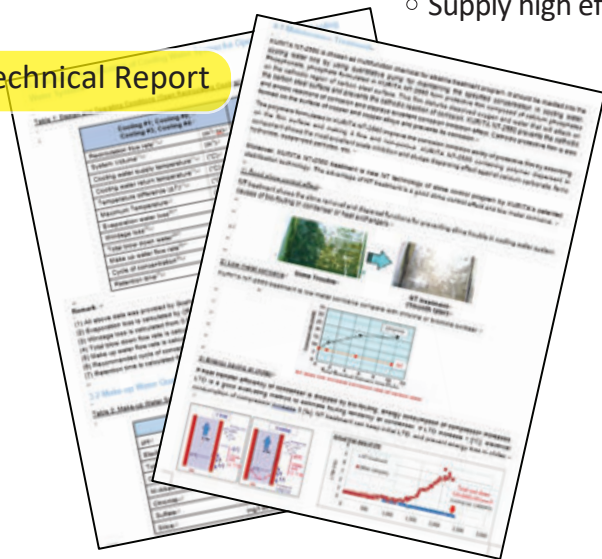

GKV supplies various chemicals in accordance with customer's requirement:

- ✓ Chemicals for water treatment
 - Apply analysis models and laboratory tests to visualize the effectiveness of GKV's chemicals to customers' system.
 - Vary our chemicals adaptively to customers' system with an economical solution.
- ✓ Chemicals for wastewater treatment
 - GKV has wide range of chemicals selectively to customers' wastewater system.
 - Specialized capable chemicals support customers to improve environmental responsibilities effectively and economically.
- ✓ Specialty Chemicals for Boiler, Cooling Tower, Chiller, Swimming Pool etc.
 - GKV provides high standard specialized chemicals.
 - GKV's expert gives concrete advice and provides technical support in using chemicals for smooth operation.
 - Supply high efficiency chemicals with environment-friendly purpose.

GKV's Chemical Stock Yard

GOSHU KOHSAN (VIETNAM)

Water & Wastewater Analysis Work

GKV has professional chemists & sampling team

GKV has fully certificates of Vietnam Environment Administration:

- ✓ VILAS 361:-ISO 17025: 2017-
 - Chemical Field of Accreditation: 58 parameters
 - Biological Field of Accreditation: 04 parameters
- ✓ VIMCERTS 124:
 - Field Surveying: measuring the parameters of pH, DO, temperature and TDS at sampling sites
 - Environmental Analysis: analyze 32 parameters for surface, ground, tap and city water; analyze 29 parameters for waste water

High Reliability Monitoring

Based on QC checks, Internal Cross check and Proficiency Test Programs

(The results of Proficiency Testing Programs by DSS- Thailand, VINALAB & CEM-VEA-MONRE are excellent from year 2009 to the present)

HSE (Health & Safety and Environment)

SAFETY IS OUR FIRST PRIORITY

- ✓ Our staffs and supporting sub-contractors are the most valuable assets to GKV. All staffs and our business partners are required to participate in proactive occupational health and safety improvement as part of GKV's commitment to providing a safe and healthy work environment.
- ✓ Everyone works together to provide and maintain a safe and healthy work environment that meets or exceeds all legislated industry standards. GKV continuously strives to control or eliminate all reasonably foreseeable hazards that may result in accidents, personal injury/illnesses, fires, security losses, or other property damage.

Quality Management

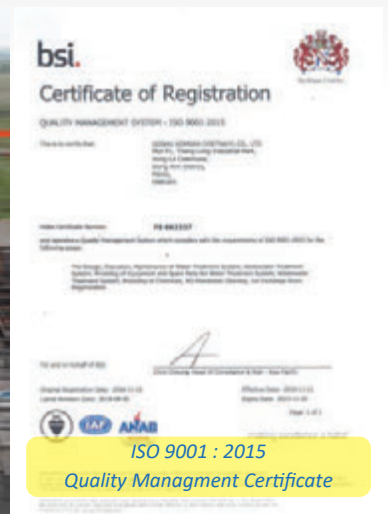

- ✓ GKV works systematically and efficiently based on GKV's management philosophy in order to provide plants, products and services satisfied customer's requirements and applicable rules and regulations. GKV aims to improve customer's satisfaction through effective operation of quality management system, continuous improvement, and preventive action against nonconformity matter.
- ✓ GKV has established Quality Management System which is met with ISO 9001, including sales activity, basic & detail design, procurement work, equipment handling, construction & installation work, operation & maintenance, chemical quality control, all related document control, etc.

Quality Inspection at fabrication shop

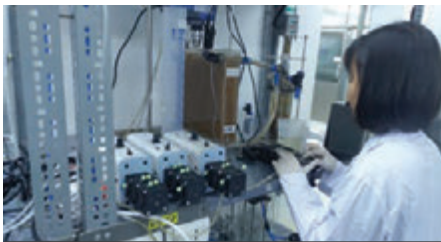

Quality Inspection at construction site

R&D Activity

- ✓ GKV conducts actively research and development (R&D) activities to develop new technologies that contributes to the creation and conservation of a safer water environment for people's life with peace of mind.
- ✓ GKV especially focuses on contributing to cost reduction for customers, reduction of footprint for plant installation, and reduction of global warming gases (GHGs).
- ✓ GKV has developed high speed coagulation sedimentation unit "GK-Separator", high rate dissolved air floatation system "GK-DAF", high efficient anaerobic treatment system "GK-UASB", membrane bioreactor "GK-MBR", moving bed biofilm reactor "GK-MBBR", etc.
- ✓ GKV is cooperating with universities, academic societies in Vietnam and Japan, as well as capable business partners in R&D field.

CSR and Contribution to SDGs

Oath of Compliance

"Compliance" is complying with all norms including ethics, internal rules of company, as well as laws and regulations, then to fully meet the expectations and demands of all our customers and stakeholders. We herein establish "Compliance Policy", and we oath to comply with all norms, rules, laws and regulations and contribute to the society.

CRS: CORPORATE SOCIAL RESPONSIBILITY

GKV, as a responsible company for maintaining water environment, complies with laws and regulations, contributes to society through business activities, engages positively in reduction environmental impact and community contribution activities as citizens. Also GKV contributes to "Sustainable Development Goals (SDGs)" advocated by the United Nations.

Major CSR Themes	Contribution to SDGs
Respect for human rights	
Fair Business Activity	
Provision of Safer Plants and Safer Services	
Contribution to improve water environment through our businesses	
Contribution to grow environmental engineers through cooperation with Universities	

COMPLIANCE POLICY

All management and employees of GKV comply with this Compliance Policy and act with awareness and responsibility.

1. Respect for human rights

We respect human rights and do not discriminate or harass any people by nationality, race, gender, age, religion, beliefs, social status, and disability.

2. Complying with all norms

We comply with laws, regulations and company regulations, and sensibly act as members of society.

3. Legally and properly dealing with business partners

We fairly deal with our business partners, and refuse any unfair or illegal activities.

4. Complying with contract

We make fair contracts with our customers and business partners and comply with them.

5. Proper management for confidential and personal information

We strictly manage all of confidential information and personal confidential information legally obtained, in accordance with laws and internal company regulations.

6. No relationships with any antisocial force

We resolutely do not make any relationship with antisocial forces giving threat against civilian.

Working Environment

GKV is providing many opportunities to all employees to have internal/external, on/off Job trainings, attend technical conferences and exhibitions for improving necessary skills, having deep knowledge and more experiences, as well as to tie good collegueship through entertainments and sports
